Attachments: Report.hw130003a.2014-10-21.NAVFAC-Resolution June 2014 Groundwater Sampling Summary Report FINAL Oct 21 2014.pdf

Carol,

Attached is the latest report, dated October 2014 and containing some of the ongoing data being collected by NAVFAC in the Areas south of the former NGC plant complex. The VPB project is progressing and I am slightly behind in sending out the updated VPB schedule. Please contact me in the interim if you have any questions as the VPB and subsequent MW data is being compiled.

Thanks,
Steve

Subject: question on Bethpage groundwater contamination

Hi Steve - I just got off the phone with Pete Mannino. He heard that the Navy had very recently found some very high concentrations of VOCs at depth in the vicinity of the Bethpage Water District wells. Are you aware of this new finding? I'm aware that the groundwater in the vicinity of the BWD wells requires treatment due to contamination, but this sounds like it might be something new.

Thanks,
-Carol-
